

TRANS-TEL DISTRIBUTED ANTENNA SYSTEM PAST PERFORMANCE

**DAS INSTALLATION NEW ARMY HOSPITAL
FORT BLISS, TX
DEPARTMENT OF THE ARMY**

Location	Dates	Trans-Tel Role
Fort Bliss, El Paso, Texas	Jul 2014 – Jan 2020	2 nd Tier Sub-Contractor

In October 2013, Trans-Tel Central LLC partnered with Berg-Helix to win award of a \$1,200,000+ contract (#2136) with \$2,738,000+ in 38 change orders to provide a distributed antenna system to a new five building hospital complex on the Fort Bliss Army base in El Paso, TX.

The project involved Trans-Tel managing one sub-contractor and being tasked with installing, terminating and testing network cable drops; pathway cores and raceways and supports for each; terminating network cable drops; installing customer provided network switches and wireless antennas as well as 34 separate communications closets spread over five stories and five separate campus area buildings.

The site manager and crew were praised by the prime contractor for a great job and for, "... all of their hard work and efforts to be the first system to successfully close out on this very long project."

This work effort concluded well ahead of contractual period of performance date without occurrence of any major malfunction and with no disruptions in service. Trans-Tel tests and certifies all installed fiber, copper and coaxial cable and delivers complete "as built" drawing packages to the owner and prime contractor upon completion.
